OpenOffice.org 3

Writer Guide

Chapter 16
Math Objects

The OpenOffice.org Equation Editor

This PDF is designed to be read onscreen, two pages at a time. If you want to print a copy, your PDF viewer should have an option for printing two pages on one sheet of paper, but you may need to start with page 2 to get it to print facing pages correctly. (Print this cover page separately.)

What is Math?

Math is OpenOffice.org (OOo)'s component for writing mathematical equations. It is most commonly used as an equation editor for text documents, but it can also be used with other types of documents or stand-alone. When used inside Writer, the equation is treated as an object inside the text document.

This chapter is now a separate document, the OpenOffice.org Math Guide. You can get a copy from the OpenOffice.org Documentation wiki, http://wiki.services.openoffice.org/wiki/Documentation/ OOo3_User_Guides/Chapters.
